Spreadsheet Table usage demonstration

Row enumeration (the simplest possible formula example)

This shows how to enumerate table rows starting from 1 on each page. With normal tables you can't do that, because it's impossible (or at least very hard) to predict where Table will split.

Row No	Favourite movies	
1	Star Wars	
2	Back to the Future	
3	Forrest Gump	
4	Fight Club	
5	The Matrix	
6	Terminator	
7	Alien	
8	Die Hard	
9	Blade Runner	
10	Star Trek	
11	V for Vendetta	
12	Twelve Monkeys	
13	The Truman Show	

This shows how enumeration behave with split.

Row No	Favourite movies
1	Star Wars
2	Back to the Future
3	Forrest Gump
4	Fight Club

Row No	Favourite movies
1	The Matrix
2	Terminator
3	Alien
4	Die Hard
5	Blade Runner
6	Star Trek
7	V for Vendetta
8	Twelve Monkeys
9	The Truman Show

Repeating bottom rows

This shows how to insert repeating rows into bottom of table. With normal Table you can only repeat top rows.

Row No	Favourite movies	
1	Star Wars	
2	Back to the Future	
3	Forrest Gump	
4	Fight Club	
5	The Matrix	
6	Terminator	
7	Alien	
8	Die Hard	
9	Blade Runner	
10	Star Trek	
11	V for Vendetta	
12	Twelve Monkeys	
13	The Truman Show	
Row No	Favourite movies	

This shows how repeating bottom rows behave with split.

Row No	Favourite movies
1	Star Wars
2	Back to the Future
3	Forrest Gump
Row No	Favourite movies

Row No	Favourite movies
1	Fight Club
2	The Matrix
3	Terminator
4	Alien
5	Die Hard
6	Blade Runner
7	Star Trek
8	V for Vendetta
9	Twelve Monkeys
10	The Truman Show
Row No	Favourite movies

Summary rows

You can insert formulas into repeating bottom rows to create summary rows. In this example I want to show you how to insert current page col sum, previous pages col sum and total pages col sum into summary row.

Employee	Monthly salary
Amy N. Jones	4802
Gloria T. Rodriguez	2986
Kyle S. Tyson	2404
Jeffrey C. Jackson	2634
Roger T. Hicks	2140
Maxine D. Luther	5951
Rita J. Colon	3381
Eva J. Bollinger	5539
William A. Fitch	5760
Martin E. Burke	3192
Richard A. Jones	2214
Richard A. Jone	4402
Stephen G. Pullen	5296
Previous pages salaries:	0
Current page salaries:	50701
Total salaries:	50701

This shows how summary rows behave with split.

Employee	Monthly salary
Amy N. Jones	4802
Gloria T. Rodriguez	2986
Kyle S. Tyson	2404
Jeffrey C. Jackson	2634
Previous pages salaries:	0
Current page salaries:	12826
Total salaries:	12826

Employee	Monthly salary
Roger T. Hicks	2140
Maxine D. Luther	5951
Rita J. Colon	3381
Eva J. Bollinger	5539
William A. Fitch	5760
Martin E. Burke	3192
Richard A. Jones	2214
Richard A. Jone	4402
Stephen G. Pullen	5296
Previous pages salaries:	12826
Current page salaries:	37875
Total salaries:	50701

More...

If you need other formulas to get your work done, please take a look into formula's source code. Formulas are very easy to write. If you write something useful, just let me know <contact@tomaszswiderski.com> and I will include it into repository.
